

# TELESCOPIC LADDER

## FEATURES

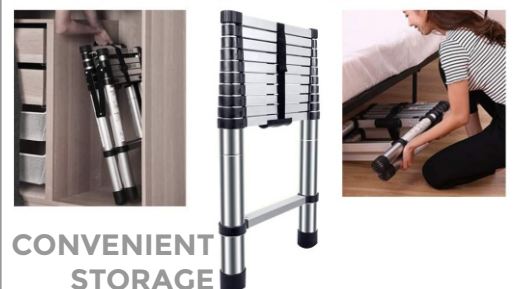

Gobler Telescoping Ladders have a high quality construction made from corrosion-resistant aluminium alloy that is qualified with the EN131 certificate. It has a sturdy frame, slip-resistant rungs and solid anti-slip rubber-tipped feet on the bottom of ladder that ensures stability.

Light-weight & Compact size that is easy to extend, retract, store and transport. Allows for effortless storage in your car or other limited spaces in the house or office.

You can unlock each section in 1-foot increments independently to tailor the ladder height to your needs.

Ideal for all type of industrial and commercial use where ladders need to be carried from one place to another. Best suited for Home/Building maintenance, washing windows, Exterior/Interior Decorating, Painting etc. This is a practical and useful ladder for individuals and professionals alike.
