

IMPULSE SEALER

8 Level Temperature Adjustment for Different Materials

- **The Gobbler Impulse Sealer** is an Electronic Instant Heat Sealing Machine that creates a seal on plastic bags to package the products safely and securely in the bag. A typical seal takes only a fraction of a second. These professional-grade units will seal bags made of Polyethylene, Polypropylene, Polyvinyl Chloride, Cellophane, Polyolefin.

- **Easy to use** table top hand-press sealing machine comes with an in-built timer to regulate the seal cycle, thus assuring that all bags are sealed equally, without the need of constant operator supervision. The light indicator lets you know when a tight seal is complete, making your sealing process vitally simple.

- High temperature resistant silica gel makes your sealer have a **longer service life**. The smooth silicone strip makes the sealing more effective. The heat dissipation technology at the bottom is carefully designed to ensure user safety.

- **Ideal for household and professional purposes** alike. Frequently used in the food & beverage industry to bag all the merchandise properly. It gives your customers a clean professional feel with a better appealing presentation of your items.

Specifications	PFS-200 (MT/PL)	PFS-300 (MT/PL)
Sealing Length	200mm / 8 inch	300mm / 12 inch
Sealing Width	2mm	2mm
Max. Seal Thickness	10 mil	10 mil
Power	300W	400W
Voltage	220V	220V
Body Material	Metal or Plastic	Metal or Plastic
