

## SCANNERS

### 1 D WIRED SCANNER

|                |   |                                                                              |
|----------------|---|------------------------------------------------------------------------------|
| Light Source   | : | 650 nm visual laser diode                                                    |
| Resolution     | : | 3.3mil                                                                       |
| Decoding Speed | : | 200scans/sec                                                                 |
| Scanning Width | : | 30cm                                                                         |
| Scanning Angle | : | Roll angle $\pm 35^\circ$ , Skew $\pm 50^\circ$ , Pitch angle $\pm 65^\circ$ |
| Button life    | : | 500,000 times.                                                               |
| Laser Life     | : | 10000 hours                                                                  |
| Drop Test      | : | 1.5m fall to concrete                                                        |

### 2 D WIRED SCANNER

|                |   |                                                                               |
|----------------|---|-------------------------------------------------------------------------------|
| Light Source   | : | 650 nm visual laser diode                                                     |
| Resolution     | : | 5mil                                                                          |
| Decoding Speed | : | 200scans/sec                                                                  |
| Scanning Width | : | 35cm                                                                          |
| Scanning Angle | : | Tilt angle $\pm 180^\circ$ , Skew $\pm 40^\circ$ , Pitch angle $\pm 60^\circ$ |
| Button life    | : | 500,000 times.                                                                |
| Laser Life     | : | 10000 hours                                                                   |
| Drop Test      | : | 1.5m fall to concrete                                                         |

### 2 D WIRED SCANNER (WITH STAND)

|                |   |                                                                               |

## GOBBLER ORBIT SCANNER

|                 |   |                                                              |
|-----------------|---|--------------------------------------------------------------|
| Light Source    | : | Red color LED                                                |
| Resolution      | : | $\geq 4$ mil                                                 |
| Decoding Speed  | : | 500 times/s                                                  |
| Scanning Width  | : | Field of View : $39^\circ(H) \times 29^\circ(V)$             |
| Scanning Angle  | : | Roll / Pitch / Yaw : $360^\circ, \pm 65^\circ, \pm 65^\circ$ |
| Light Life      | : | 5 years                                                      |
| Drop Test       | : | 1.2m drop                                                    |
| Working Current | : | 320mA                                                        |

### Drop resistance & Shockproof Design

Can sustain up to 1.5m/5ft drops from ground

### Support add Prefix & Suffix

According to your need to customize prefix and suffix
